

# BCCC

Baltimore City Community College

## ARTS AND SCIENCES TRANSFER, **ART**

Area of Concentration  
Associate of Arts

The Arts and Science Transfer-Art (area of concentration) inspires, develops, and transforms each emerging artist's intellectual and creative attributes which allows for optimal expression and exploration of artistic genres, techniques, art history, and literature.

Following admission, the student progresses at his/her own pace through the foundation selected courses designed for advanced study leading to a bachelor's degree. Each student is fully assisted in the process of transferring to a four-year college or university.

With assistance from the Program Coordinator and the College's transfer counselors, students may either transfer to continue their academic training or follow a more direct career path into the Visual Arts.

Students can explore a variety of careers within the creative arts, including sculptor, illustrator, painter and many more. Earning potential in these professions can vary greatly depending on the individual's level of experience and exposure.
